About posiHead

**posiHead is an app dedicated in
providing free, easy to access mental
assessments by the power of AI and
game development.**

Our UI

Brainstorm >>

"posiHead is to help you increase your positive thinking while you're storing healthy affirmations inside your head."

"What is your name?"

Say here...

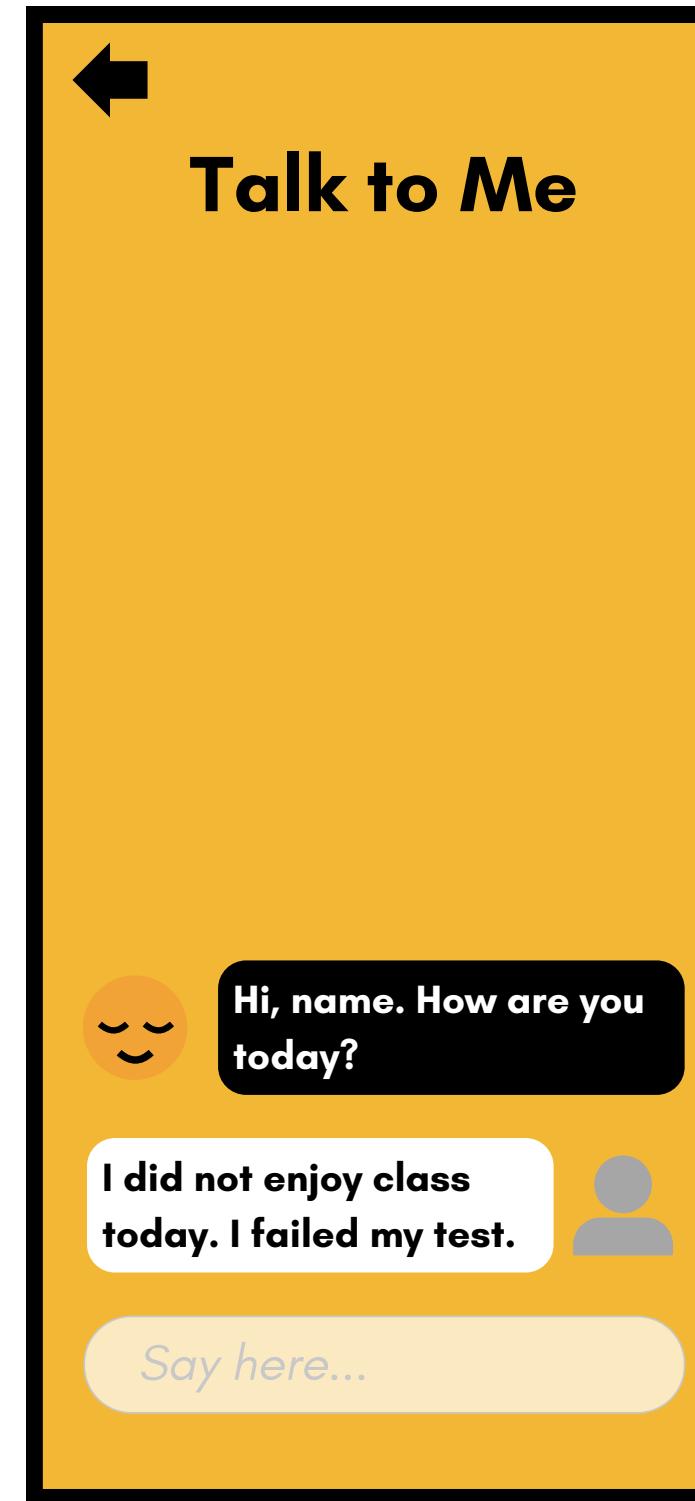

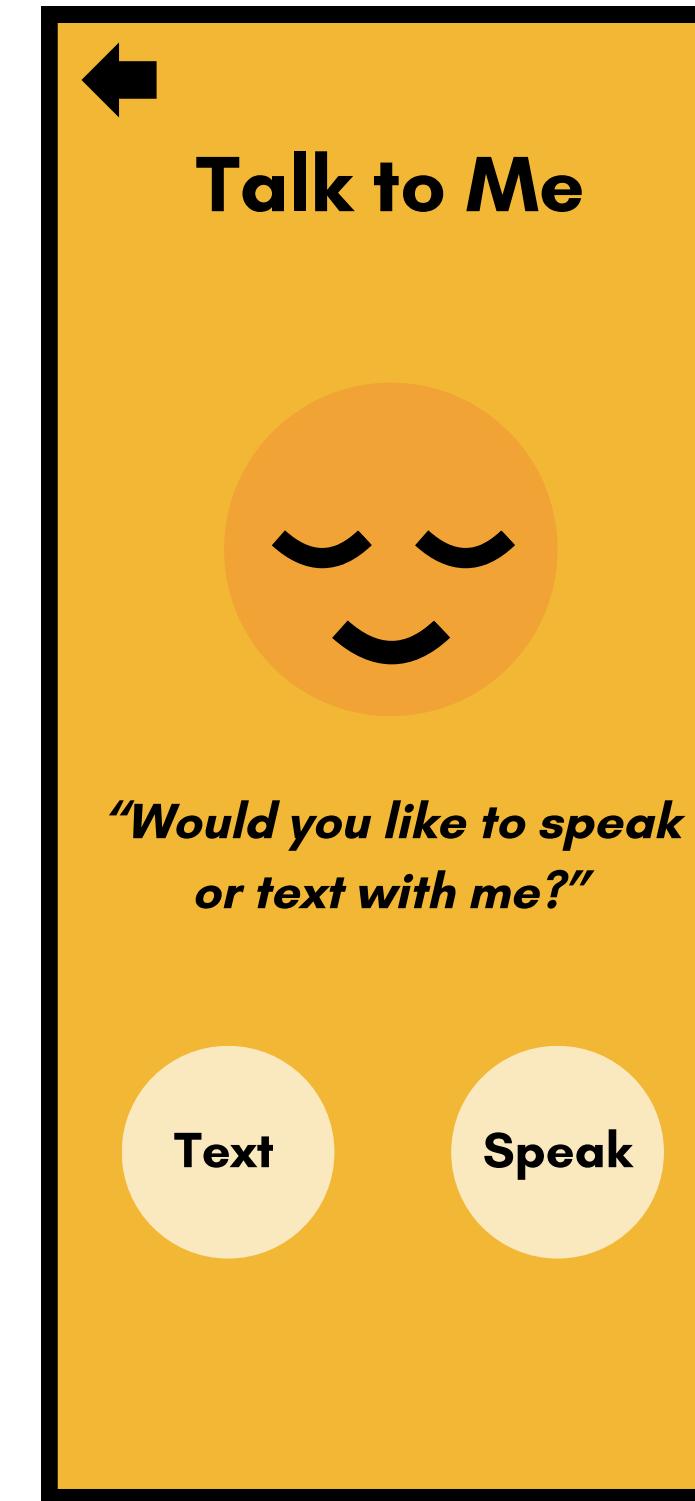

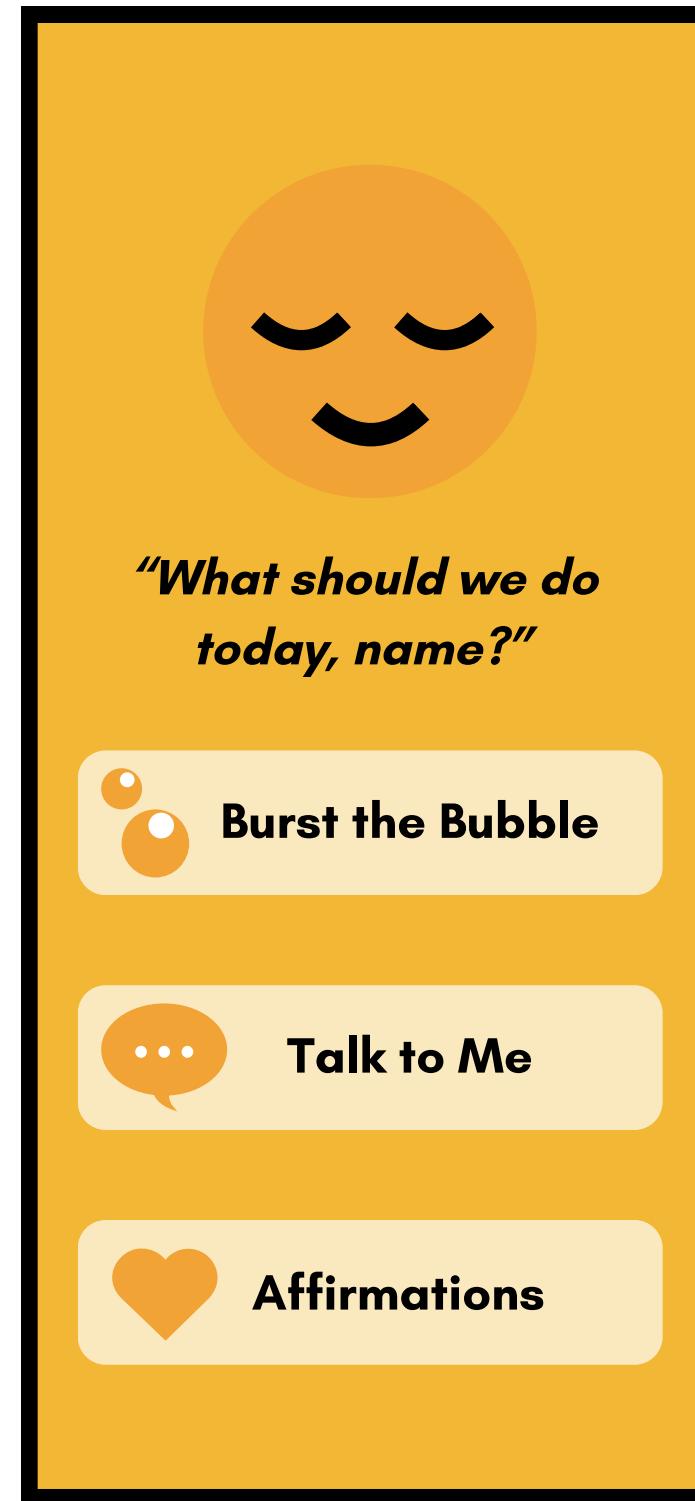

"What is your email?"

Say here...

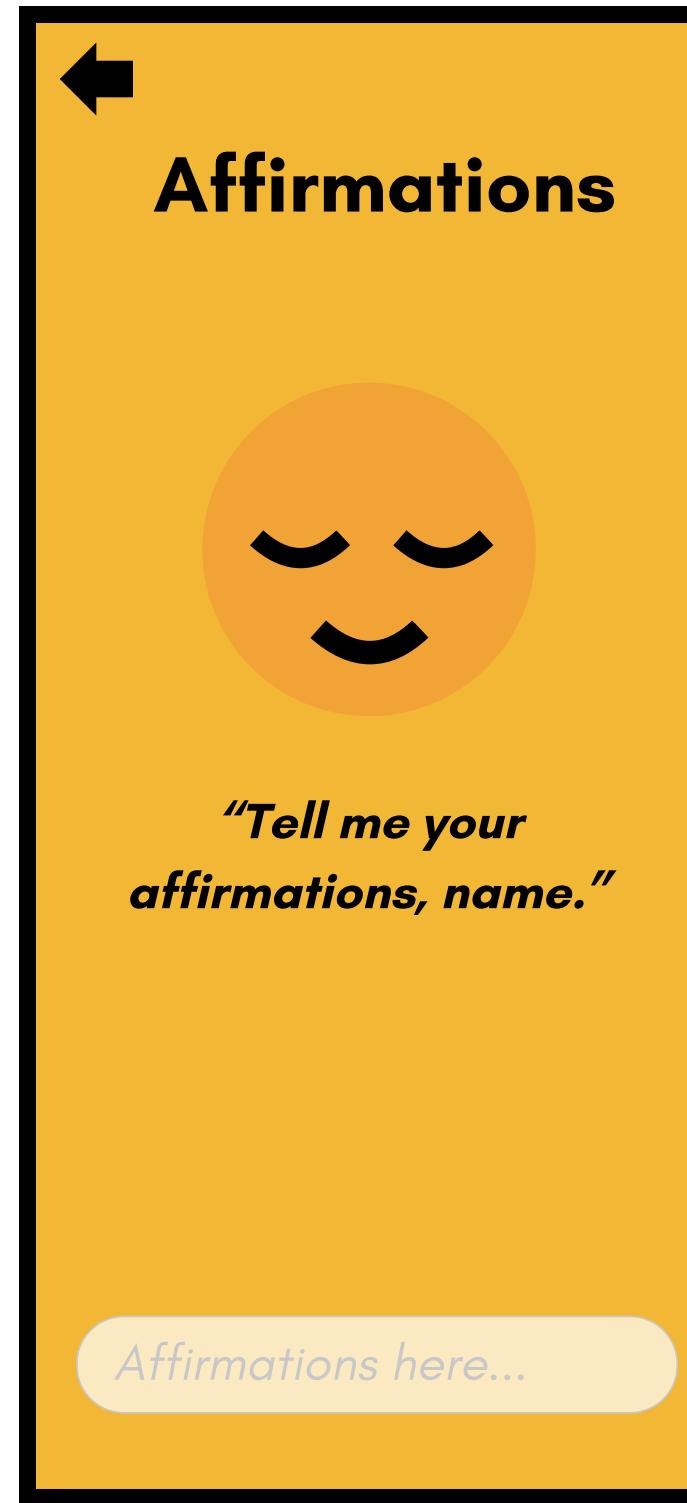

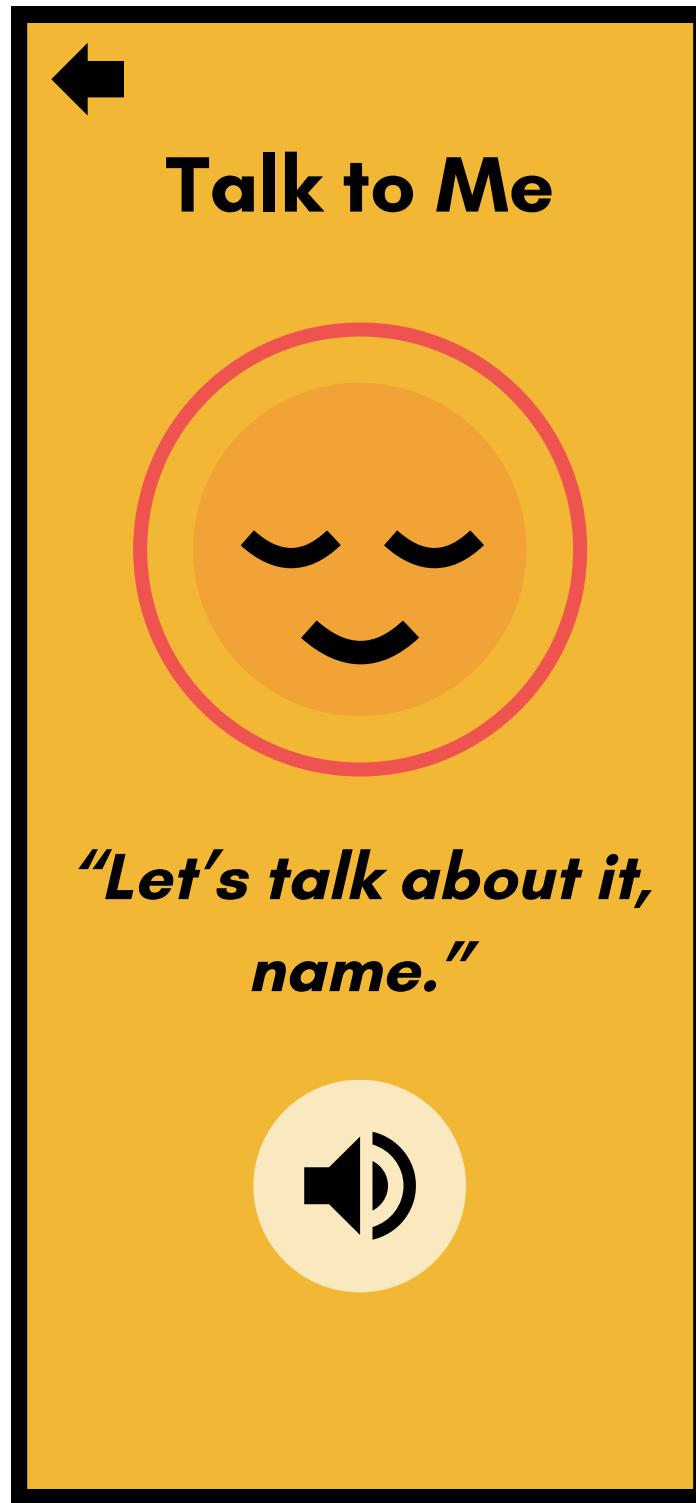

"What is your password?"

Say here...

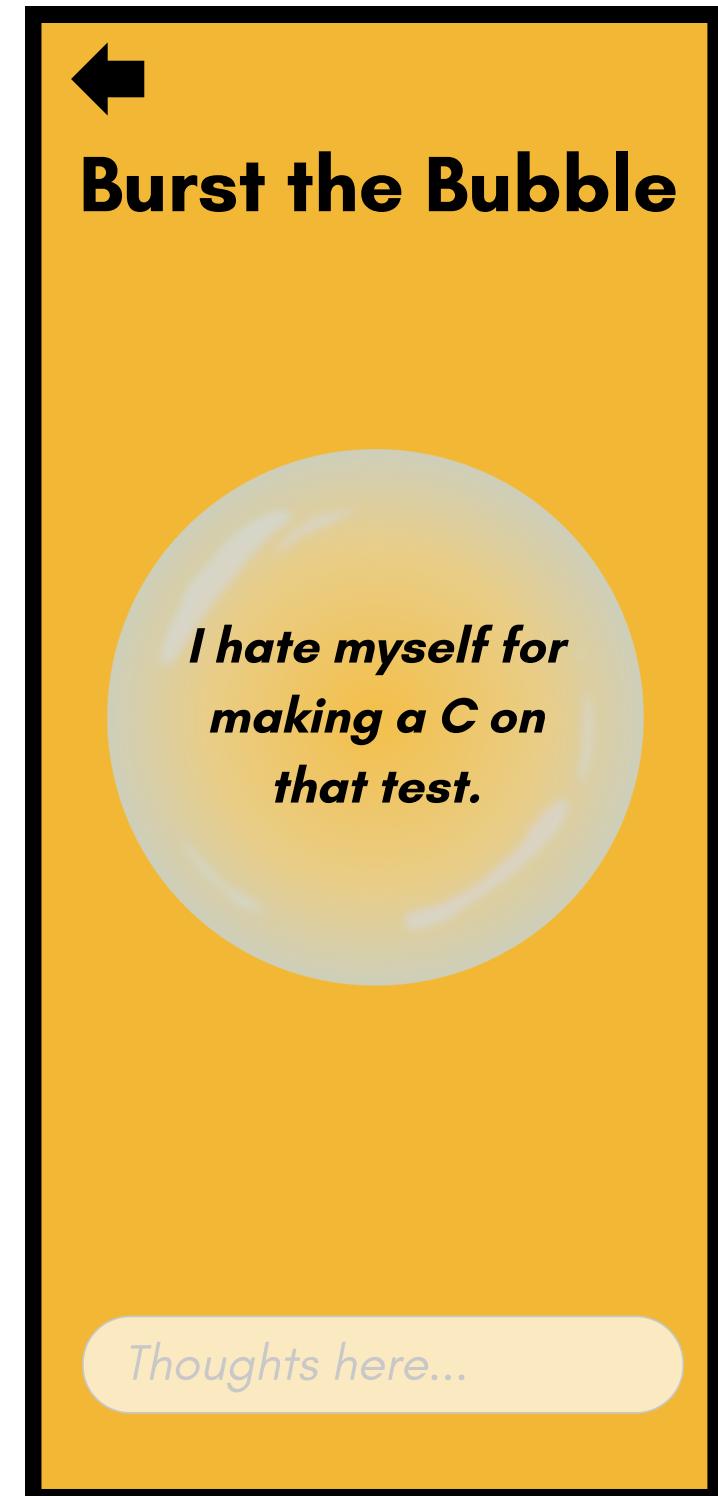

**red ring appears when
AI is talking to user**

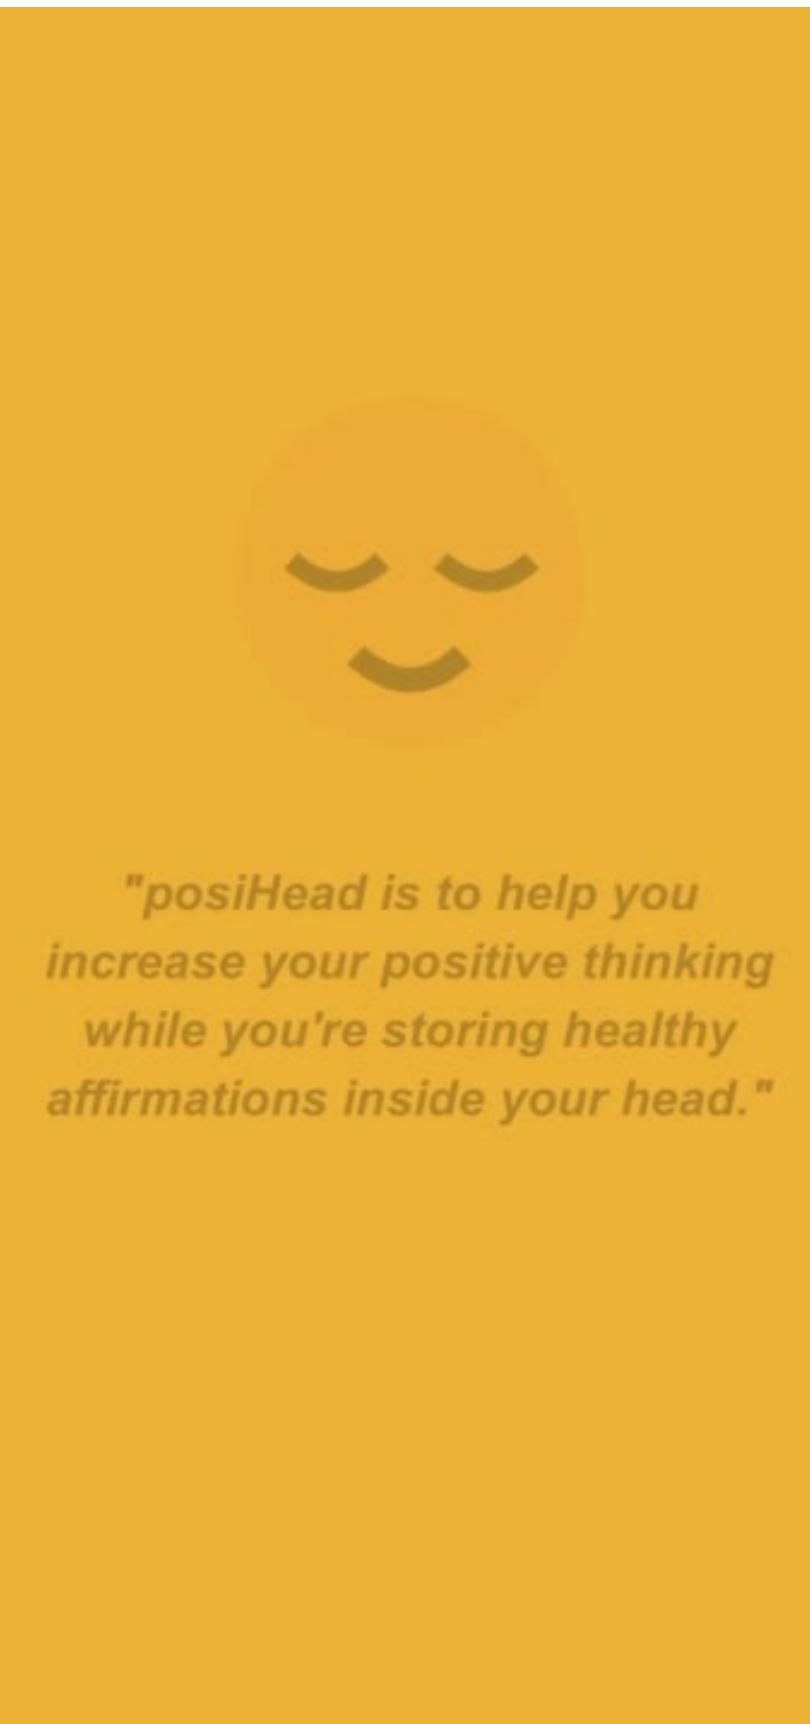

the AI will read out your affirmations using text to speech

Users pops the negative thought away... (visual and audio popping occurs)

User hears a ding noise since this is a positive thought... continues to the next thought entered...

App Testing

"posiHead is to help you increase your positive thinking while you're storing healthy affirmations inside your head."

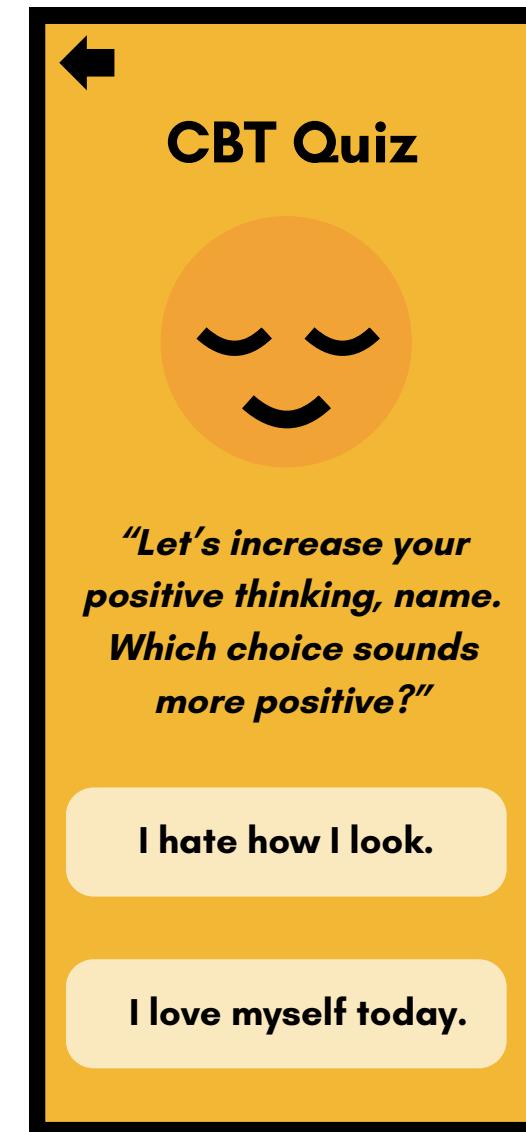

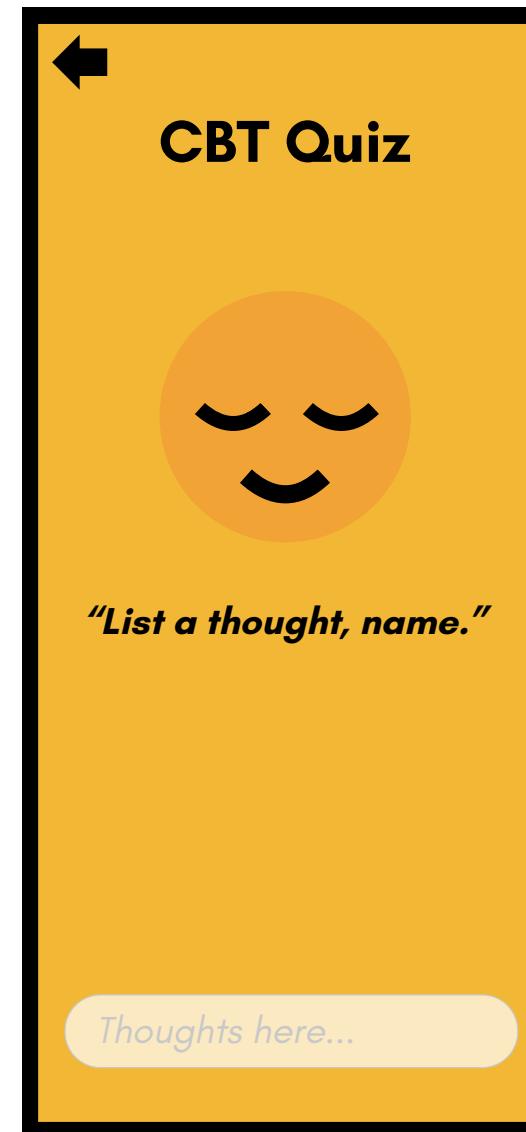

Mobile App Testing

Web App Testing

Future of posiHead

- **full application development**
 - **combining all parts of the code together into one system and database**
- **more mobile application testing**
- **and more positivity!**

only appears if a negative thought was entered

→ "Let's try that again."
→ "Great job, name!"
